

Partners' Commitment on Non-Discrimination

SOSFood project is an EU-funded initiative designed to improve the health and nutrition of European citizens with the support of AI and Machine Learning methods.

This objective will be reached through an in-depth analysis of the EU food system that will result in a consolidated food data space focused on sustainability and health, thus providing decision-making tools which will help actors along each level of the food value chain, particularly impacting in two ways:

1 – Helping industries to improve the sustainability of their food production, treatment, and waste management.

2 – Aiding consumers to improve their dietary decision-making by increasing information on the eco-healthy fingerprint of the alimentary products, a greening indicator of industries, the reformulation of traditional recipes and other general recommendations.

SOSFood has a precise social dimension since its inception, aiming to provide solutions that improve public health and well-being, promoting sustainable practices and collaborating towards achieving a better society for everyone.

In line with this spirit, the partners of the SOSFood consortium are unwavering in their commitment to respect all European policies and regulations. This includes non-discrimination, gender equality, and the protection of labour and human rights of all individuals associated with the project, regardless of their role or association.
